

Columbus State University Department of Chemistry proudly presents

Professionals in the field: Success as an Industrial Chemist

Bret Blackmon, BS Chemistry
Director of Technical Services
Integrity Innovations Group

Bret graduated in 2013 from CSU and completed his undergraduate research with Dr. Holley. The title of his research project was, "Synthesis and Characterization of Encapsulated Polystyrene."

Post graduation, Bret accepted a position with the High-Performance Polymer and Engineering (HPPE) company as an entry level chemist. After under a year on the job, he was promoted to lead chemist. His work was so successful that it led to the company selling his division to a company (Integrity Biochemistry) out in Texas where he continued as an outstanding chemist. Bret was recently promoted to Director of Technical Services of the Integrity Innovations Group.

People of all academic backgrounds are welcome!

Meet the speaker

Friday, September 29
1:30—2:00 p.m.
Jordan Hall, Room 362

Attend the presentation

Friday, September 29
2:00—3:00 p.m.
Stanley Hall, Room 207

The American Chemistry Society—student affiliate chapter is an official student chapter of the American Chemical Society (ACS).
