

Columbus State University Department of Chemistry proudly presents

Professionals in the field: Success as an Industrial Chemist

Kameron Smith BS Chemistry
Senior Manager of Formula Implementation
Refresco, Inc.

Kameron graduated from CSU in 2016 with a B.S. in Chemistry (ACS Certified) and then again in 2019 with an MS in Natural Science (Chemistry). During her time at CSU, she was active in ACS as well as Honoris Causa, the student organization for the Honors College, where she served as president for two years. Kameron completed her undergraduate research with Dr. Meyers.

Since leaving CSU, Kameron has been employed at Refresco Beverages (previously Cott Beverages)- the world's largest independent bottler that boasts an R&D department right here in Columbus. She has worked in a variety of roles at Refresco. She started her journey as a Quality Lab Technician, and then moved to work in the Product Development lab. In 2019, she stepped out of the lab to create and manage the Formula Implementation team, which she affectionately calls the "Paperwork Department", where she is today.

Attend the presentation

Thursday, February 15
12:30-1:30 p.m.
Stanley Hall 209B

The American Chemistry Society—student affiliate chapter is an official student chapter of the American Chemical Society (ACS).
