We'll get through this together.

Things may feel out-of-control right now. You may be facing a lot of unknown and disruptions. Try to be patient with yourself, your classmates, and your instructors during this time. Take care of your wellbeing first. Making a plan and adjusting your studying may help you feel even a little sense of control.

1. Staying Organized

With so many things changing in your courses, you might be reliving that first-week-of-class confusion at finals-week pace.

Here are some things you might want to keep track of for each class:

- Are in-person parts of the class changing?
  - What are the in-person parts of this course? (lecture, lab, etc)
  - Where can you find it our how do you access it? (livestream, lecture capture, etc.)
  - Is it at a specific time or can you watch it anytime?

- Are assignments changing?
  - Are there new dates?
  - Is how you're submitting your assignments changing?
  - Are any quizzes or exams being offered virtually?

What should you do if you need help?

- Is your course offering virtual office hours? When and on what platform?
- Is there an online forum for asking questions?

One example of a way you could keep track:

<table>
<thead>
<tr>
<th>Important dates</th>
<th>Class 1</th>
<th>Class 2</th>
<th>Class 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>big changes</td>
<td>No lab</td>
<td>Discussion optional</td>
<td>Paper Due Friday</td>
</tr>
<tr>
<td>important links</td>
<td>Live lecture</td>
<td>Recorded lecture</td>
<td>May do paper instead of a group project</td>
</tr>
</tbody>
</table>

Lecture link | Office hours link | Discussion link | Lecture link | Group paper folder |

This guide is a derivative of "Adjusting your study habits during COVID" by Center for Academic Innovation at the University of Michigan, used under CC BY 4.0 by the Office of Quality Enhancement Plan at Columbus State University.

Your study habits may need to change.

While more of your coursework and teamwork have to be online and remote, here are some strategies to keep in mind:
2. Avoiding multitasking

If you're doing more work on your own and your time is less structured, you might be more tempted to multitask. Many people think they can do multiple things at once. But research shows us that only about 2% of the population can multitask. Even if you feel like you're multitasking, you're probably not...really, you're switching between tasks very quickly (some call this "micro-tasking").

The downsides of multitasking:

- **Assignments take longer.** Each time you come back to an assignment (from Instagram for example), you have to get familiar with it, find your spot, remember what you were going to do next, etc.
- **You are more likely to make mistakes.** Distractions and switching between tasks tires out the brain.
- **You'll remember less.** When your brain is divided, you're less able to commit what you're learning to long-term memory (because it doesn't get encoded properly into your brain).

What to do instead

When you need to study something important, consider **The Magic of Monotasking.**

- Focus on one thing at a time
- Take breaks between tasks
- Consider the "pomodoro method" to help you focus for 25- or 50-minute periods and then reward yourself with 5- or 10-minute breaks

3. Making the most of video lectures

- **Stick to your instructor's schedule as much as you can.** Staying on a schedule will help you have a feeling of normalcy and prevent you from falling way behind.
- **Find out how to ask questions.** Is there a chat feature? Is there a discussion forum?
- **Close distancing tabs and apps.** Humans are not as good as multitasking as they think! (See #2)
- **Continue to take notes as you would if you were here in person.**
- **Watch recordings at normal speed.** Research shows that playback speed of 1.5x can lower your retention and can result in lower scores on assessments. Faster playback speeds are worse for complex, multi-step material (which most of your lectures probably are). Remember: this is all about 1.5x. There hasn't even been research on 2x playback speed, which is probably even worse.

Here are some things you might want to keep track of for each class:

4. Setting a schedule

As the situation unfolds, you may have fewer social commitments, group meetings, or work hours. Setting a schedule for yourself can help provide structure and keep you motivated. If you don’t already keep a weekly or daily calendar, try something like the example below to organize your time. Include time for exercise and self-care.
5. Trading your strategies for new ones

Your routines may have to adjust during this time. Look for ways to adapt your usual habits or form new ones.

For example:

- **If you usually study in a coffee shop or library**, ask yourself what kind of environment helps you study. See if you can recreate that at home. Maybe it’s studying in a chair, rather than on your bed or couch, or moving to a new spot when you change tasks. If you feel you need background noise, consider a white noise app.

- **If you always study in groups**, try a virtual or even phone-based session with your group.

- **If you thrive on tight timeline, but have a more open schedule**, think about how working with others or setting up a schedule can recreate that for you. When that gets hard, see if you can even do fifteen minutes at a time.

### Schedule Template

<table>
<thead>
<tr>
<th>Scheduled Activity</th>
<th>Course Tasks</th>
<th>Personal / Self-care</th>
</tr>
</thead>
<tbody>
<tr>
<td>8am</td>
<td></td>
<td>Shower, Breakfast</td>
</tr>
<tr>
<td>9am</td>
<td>Call in for remote lecture</td>
<td></td>
</tr>
<tr>
<td>10am</td>
<td>Read chapter 3</td>
<td></td>
</tr>
<tr>
<td>11am</td>
<td>Break - video call with friend</td>
<td></td>
</tr>
<tr>
<td>12pm</td>
<td>Lunch</td>
<td></td>
</tr>
<tr>
<td>1pm</td>
<td>Read chapter 4</td>
<td></td>
</tr>
<tr>
<td>2pm</td>
<td>Recap lecture with classmate</td>
<td></td>
</tr>
</tbody>
</table>

### 3. Working with a group or team

Remote collaboration will look a little different, but it is definitely possible

- **Try not to procrastinate.** That group project may be out-of-sight, out-of-mind if you aren't seeing each other regularly. Resist the urge to put it off. Make small progress and stay in touch.

- **Meet regularly**, especially if you usually touch base during class or lab. Consider a quick text on your group chat about progress every couple of days. Ideally, have real conversations over video any week you're working together.

- **Set a purpose for meetings and use a shared notes doc.** Meetings might feel different when using video, even if your team was really good at working informally in the past. Try to set the purpose of your meeting in advance. Take notes in a shared doc so you can all contribute and follow along.

- **Keep videos open when you can.** As long as you can see whatever you need to collaborate, aim to keep the video visible on your computer screen. It’ll help you see the expressions of your teammates and stay connected to each other.

- **Check on each other and ask for backup.** If someone has been absent from your group meetings or chat, ask them directly if they’re still able to participate in the project. If you aren’t getting responses within a day or two, let your instructor know. Know it isn’t being petty, it’s your team’s responsibility.
7. Staying connected to other people & taking care of yourself

Even if we limit how much face-to-face time we spend with others on campus, connecting with family and friends might be more important than ever. And staying in touch with instructors, classmates, and group mates is still important for continued classwork.

Here are a few ideas:

- **Schedule video calls with friends and family.** Talking with loved ones is often really helpful when you’re stressed or nervous about something. Taking a break to have a laugh is also important.
- **Use Hangouts in CSU Gmail** to connect with classmates to talk through a tough problem.
- **Attend virtual office hours** or study groups so that you can stay up on your coursework.
- **Getting out for a walk.** Bing in nature and getting exercise allow you to take a break from technology, relieve stress and anxiety, and improve your mood.

Please remember, this will pass.

If COVID has disrupted your travel plans, ended a lab you were excited about, or for any reason feels like it came at the worst possible time, remember: this is temporary. You'll find your way when it settles down. You'll get back on track, and things will get back to normal. We don't know when, but it will happen.

Until then, take a deep breath, do your best, get some rest, and wash your hands.
