
Mission and Goals

Mission

The mission of the Mathematics Collaborative at Columbus State University is to enhance the mathematics education of K-16 students through the development of teacher leaders, beginning with initial preparation and continuing through their professional teaching careers. The CRMC resource staff and local teacher leaders mentor other teachers and administrators, encourage parent and public involvement in mathematics education, and help develop means to support all teachers of mathematics in their professional growth. The goal of the CRMC is for all students to learn that mathematics enables them to continue their education, to make informed decisions as citizens, and to participate fully in their chosen vocations.

Goals

- Enhance the preparation of prospective mathematics teachers at Columbus State University.
- Develop teacher leaders using the most current mathematics education research and best practices for classroom instruction.
- Foster the teaching and learning of meaningful mathematics for all students, grades K-16.
- Facilitate collaboration between the University and local education agencies, colleges within the University, and the community.
