

Services & Fees

Since 1989, the Columbus Regional Mathematics Collaborative (CRMC) has proudly provided quality professional development, support, and resources to area K-12 mathematics teachers, as well as to preservice teachers, within a 65-mile radius of Columbus. Below you will see an outline of services offered and their costs. The CRMC Director will be happy to assist in determining which services best meet the needs of your teachers, schools, and system.

Services provided by the Math Collaborative:

Services are intended to provide support and professional learning during the scholastic year, system-wide, for K-12 teachers, beginning on the first teacher day and ending on May 31. Services requested prior to the first teacher day and subsequent to May 31 are considered summer work and can be purchased separately.

CRMC and each contracted system will share responsibility for ensuring delivery of purchased services.

Service Schedule

Here is an outline of our services.

We strongly encourage you to contact us directly.

Each service is tailored to the needs of our client.
