

Assessment Council

Notice: In reviewing the college budget, the council and publication of the annual COEHP Fact Book [Unit and Departmental] have been discontinued as of January 2, 2020 by the Dean. Departments can continue to pull data from the [OIR&E webpage](#) and use these data as needed in reporting. Facts and Figures Website can be accessed [online](#).

Purpose

The *College of Education and Health Professions (COEHP) Assessment Council* was established to manage, maintain, and formally document meaningful data. The Council is charged with providing annual, departmental books that include college, department, and program data. In addition trend analyses and retention data are documented.

The Council works closely with the following entities:

1. The council members' respective accreditation chairs to make certain that the reported data are aligned with accreditation requirements
2. The Office of Institutional Research, University Information and Technology Services, Retention Committee, and Tk20 Coordinator
3. Department Chairs, Program Coordinators, and Program Faculty: To document Key and/or Course Critical Assessments and student performance

Note: Each course critical assessment begins with a documented, detailed purpose statement; is deemed valid and reliable by the program faculty, program coordinator, and chair; provides a thread of consistency with the same course over the years regardless of who teaches the course or what venue is used; etc. Please contact your council representative or Dr. Sallie Averitt Miller for more information and guidance on course critical assessments.

Transparency of Data

The data are shared during the following meetings and activities (as appropriate):

Meetings	Data Collaboration
Faculty and Staff	Monthly
Leadership Council	Monthly
Department Meetings	Annually
Program Meetings	As Needed
Data Day Meeting	Annually
Educator Preparation Program Council	Semester
Program Advisory Councils	Annually
Other Meetings	As Needed

Data Use

Data are used for local, state, regional, and national reporting; accreditation; program improvement; trend analyses; data transparency; impact on student learning; retention; and unit operation decisions.

Council Membership
