| 292012 | Fall 2015 | HESC-5187U | Barriers Associated with Collection of Research | <p>For this honors contract I am volunteering for Dr. Thomas Joy to help collect data for her research project, Housing and Urban Development Authority project. This is a five year study conducted in the area to help with homelessness. This will allow me to gain exposure to a community based initiative. I will be involved with helping people in the given community fill out surveys. If a number of people do not come to the location where the surveys are conducted, we may have to go door to door and ask people for their time to fill them out. I believe there will be many barriers associated with the collection of research.</p> <p>Therefore, I want to present to my class barriers that may be involved and how to overcome them when performing primary data collection.</p> |
