|------------|-------------|-----------|----------------|---|
| 271012 | Spring 2015 | HESC-4129 | Hospice Care | <p>In this course Death and Dying, I want to learn more about the environment within a hospice care facility. I want to learn how the physicians interact with the patients, along with the influence hospice care has on the entire family as a whole. Therefore, I would like to volunteer at a hospice care facility. I hope to be able to interact with the patient, family and/or physician while I volunteer. I want to learn how they cope with the situation and learn about the different treatments the physicians use with the patient and their families.</p> <p>I will then create a presentation and/or talk to the class to share with them my experience.</p> |
