Contract #	Term	Course	Contract Title	Contract Description
273023	Spring 2015	HIST-3156I	The Psychology of Land Deeds	I will be transcribing a document from 15th century London. It is a land deed kept in the Alva Smith collection in the archives. After I have transcribed it, I will find connections between Psychology and this particular document and apply it to the situation in Europe in the 1600s. I will then create a PowerPoint or other sort of presentation to present to the class the connection I made with the deed, Europe in the 1600's, and Psychology.
275011	Spring 2015	HIST-3125		In addition to my 10 page final research paper, which I am writing about the relationship between the Native Americans and the colonists in the years before the Trail of Tears, I will be writing an additional paper that complements that theme. I am currently interested in how the religion of the colonists and Natives played a role in their relationship, but the exact topic will have to be determined by what I find in my research. The idea is for me to grow more accustomed to the archives by using them for the additional research.
