426082	Summer 2019	MUSC 4555	Reflection of Alexander Technique Use of Language	<p>While I am in Oxford, I will be taking a private lesson with Alexander Technique clinician, Claire Creese. During my lesson I will be taking note of the language she uses to work with me. After the lesson, Ms. Creese has agreed to do a short interview or discussion segment with me which I will then transcribe and reflect upon. My overall goal is to understand the type of language that must be used, particularly with children, to help understand anatomy and body function while avoiding mismappings within the body.</p>
