Enterprise Software and Development

The UITS Enterprise Software and Development team supports and maintains enterprise software used by the institution. The following are just some of the applications they support:

- Banner/SIS - Student information System
- Banner Workflow
- CougarScheduler - Event Registration Software
- Hyland OnBase - Imaging software
- TouchNet

In addition, they also provide support for:

- Report Development
- Software Application Development
- Database Support
- Facilitate data integration between third-party systems and University systems

To request support from the Enterprise Software and Development team, please submit a request via eQuest.
